1. Use the Print button on this page to print your label to your laser or inkjet printer.

2. Fold the printed page along the horizontal line.

3. Place label in shipping pouch and affix it to your shipment so that the barcode portion of the label can be read and scanned.

Warning: Use only the printed original label for shipping purposes as fraudulent result in additional billing charges, along with the cancellation of your FedEx account number.

Use of this system constitutes your agreement to the service conditions in the current FedEx Service Guide, available on fedex.com. FedEx will not be responsible for any claim in excess of \$100 per package, whether the result of loss, damage, delay, non-delivery, misdelivery, or misinformation.

Unless you declare a higher value, pay an additional charge, document your actual loss and file a timely claim, limitations found in the current FedEx Service Guide apply. Your right to recover from FedEx for any loss, including intrinsic value of the package, loss of sales, income interest, attorney's fees, costs, and other forms of damage whether direct, indirect, consequential, or special is limited to the greater of \$100 or the unauthorized value. Recovery cannot exceed actual documented loss. Maximum for items of extraordinary value is \$1,000. e.g., jewelry.

For FedEx Service Guide, written claims must be filed within strict time limits, see current FedEx Service Guide.

Study: Johnson's Baby Powder Sampling

LIMS #: 20180015

One (1) bottle of Johnson's Baby Powder was delivered in person on 19 January 2018 for sub-sampling using a cone and quartering method to prepare two 2oz sample aliquots. The sample was stored at room temperature unopened and was photographed (Figure 1) and logged into a laboratory information management system (LIMS) designated as sample 20180015-01 (Table I). Sub-samples removed from this bottle were subsequently identified and labeled as aliquots "A" or "B."

Table I: Sample Designations

LIMS #	Client ID	Description	#
20180015-01	JBP084 sample 06	Johnson's Baby Powder	1
20180015-01A	JBP084 sample 06A	Talc powder	2
20180015-01B	JBP084 sample 06B	Talc powder	2

Two objectives for obtaining 2 sub-samples from this bottle of baby powder were to 1) maintain the sample integrity by preventing contamination and 2) create two representative samples for two parties. To minimize contamination of the powder by foreign particulates, the sample splitting was performed in an enclosed plexiglass glove box purged with dry nitrogen (AirGas) to create a positive pressure in the box. To produce two representative samples from this powder, a "cone and quarter" method was employed to divide the sample evenly into the client-

requested 2oz (~56.6g) portions. This methodology is described in several publications including the chapter USP 40 <1097> Bulk Powder Sampling Procedures. Sample splitting was performed on 24 January 2018 in the presence of the following individuals at the laboratories of Alliance Technologies, LLC, 9 Deer Park Dr. Suite B, Monmouth Junction, NJ 08852.

126 E. 56th St., 6th Fl. Tower 56 New York, NY 10022

The sample splitting was performed by Edward Witlicki, Ph.D. (Senior Scientist, Alliance Technologies) under the supervision of Scott Tittle (Laboratory Manager, Alliance Technologies) and Jonathan Chun, Ph.D. (Principal, Alliance Technologies) and began with a determination of the total powder weight by weighing the unopened bottle on a top-loading balance (Mettler PJ6000, S/N K56113, Last Cal. 17Mar2017, Next Cal. 17Mar2018) then the empty bottle after the contents were poured out. The net weight of the bottle contents (Sample 20180015-01) was found to be 408.8 g (14.4 oz) before sampling.

The entire contents of the bottle were placed on an aluminum foil lined plastic tray and formed into a cone then split into quarters using stainless steel spatulas. The cone and quarter procedure was repeated until samples could be dispensed into 50mL metal free centrifuge tubes (VWR P/N 89049-174). Two tubes were filled with the baby powder and labeled as 20180015-01A1 and 20180015-01B1, but due to the density of the powder, a second tube was required to contain the target 56.6g (2.0oz) of sample. A second set of tubes was labelled 20180015-01A2 and 20180015-01B2. The actual weights were recorded (Table II) and the net weight of the two aliquots were 58.7g (2.07oz) for aliquot "A" and 57.9g (2.04oz) for aliquot "B."

9 Deer Park Drive ~ Suite B

Monmouth Jct., NJ 08852

info@alliancetechgroup.com

The remaining powder was returned to the original sample bottle and had a net weight of 286.9g (10.1oz). The re-sealed sample bottle was returned to room-temperature storage after sample splitting. The two Sample "A" tubes were relinquished to counsel from the Lanier Law Firm and the two Sample "B" tubes were relinquished to counsel from Orrick, Herrington, Sutcliffe, LLP.

Re: Teresa Leavitt case – J&J samples

Dear Dr. Longo,

Enclosed please find the following samples of talcum powder produced by Johnson & Johnson in the Leavitt case:

1. Sample numbered 20180056-02D, taken from bottle with sample number JBP 209;
2. Sample numbered 20180056-06D, taken from bottle with sample number JBP 213;
3. Sample numbered 20180056-31D, taken from bottle with sample number JBP 238;
4. Sample numbered 20180056-34D, taken from bottle with sample number JBP 241;
5. Sample numbered 20180060-25D, taken from bottle with sample number JBP 188;
6. Sample numbered 20180060-49D, taken from bottle with sample number JBP 092;
7. Sample numbered 20180060-50D, taken from bottle with sample number JBP 093;
8. Sample numbered 20180060-67D, taken from bottle with sample number JBP 110;
9. Sample numbered 20180060-68D, taken from bottle with sample number JBP 111; and
10. Sample numbered 20180070-86D, taken from container with sample number 2014.001.5102.

Also enclosed please the following materials:

Exhibit 1 to this letter is a series of Chain of Custody Forms for these samples; at your convenience, please complete the form and send a copy to me (you can scan the signed form and email it to jdischinger@levylaw.com).

Exhibit 2 to this letter is a set of photographs produced by Johnson & Johnson to Plaintiff prior to the sample split.

Exhibit 3 to this letter is a copy of the forms completed by representatives for plaintiff, defendant, and the lab where the split was performed.

If you have any questions about these samples, please contact Joe Satterly or Moshe Maimon.

Sincerely,
LEVY KONIGSBERG LLP

Joshua Dischinger
